Subject: IAVerify Verified Product – Broadcom/Symantec Edge SWG, Software version 7.4

The Edge Secure Web Gateway (Edge SWG), running on the Integrated Security Gateway (ISG) or VMware vSphere, with Management Center, has been validated against all applicable requirements in Reference (4). Each requirement has been sourced from the DoD CCI in References (1), (2), and (3). Details on all configurations and implementation can be obtained in the final Assessment Report. The Edge SWG running software version 7.4 meets all requirements, is in an excellent cybersecurity state, and is recommended for procurement.

Note: On 11 June 2025, Broadcom/Symantec also underwent a DoD Approved Products List Certification (DoDIN APL) test for the Edge SWG.

Signed

Jeremy Duncan
